13- WEBSITE LINK

The company already had a website, but it had a few issues.

So we suggested making several improvements to enhance its quality and search engine ranking, such as:

1. Adding the Arabic language option
2. Adjusting the color scheme to match the brand's colors
3. Fixing some technical and coding errors on the website
4. Removing services that the company does not actually provide
5. Updating the Contact Us page to make the phone number a primary element, since most of their customer interactions happen through calls

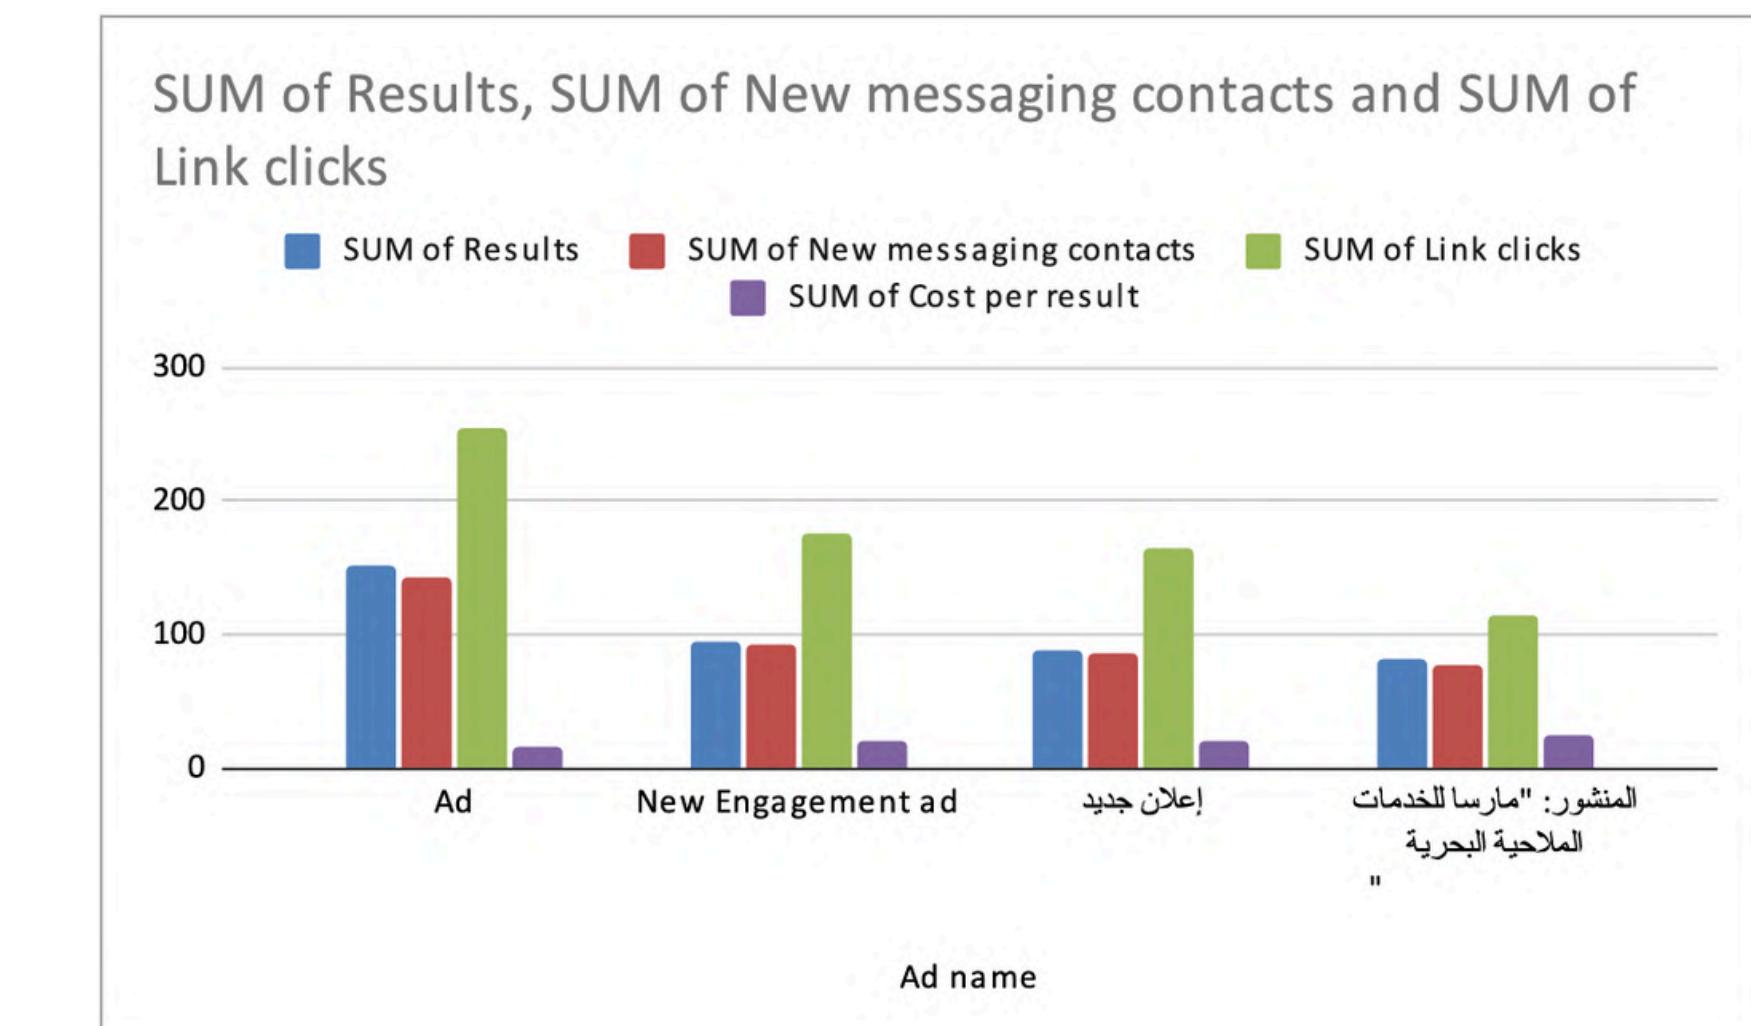

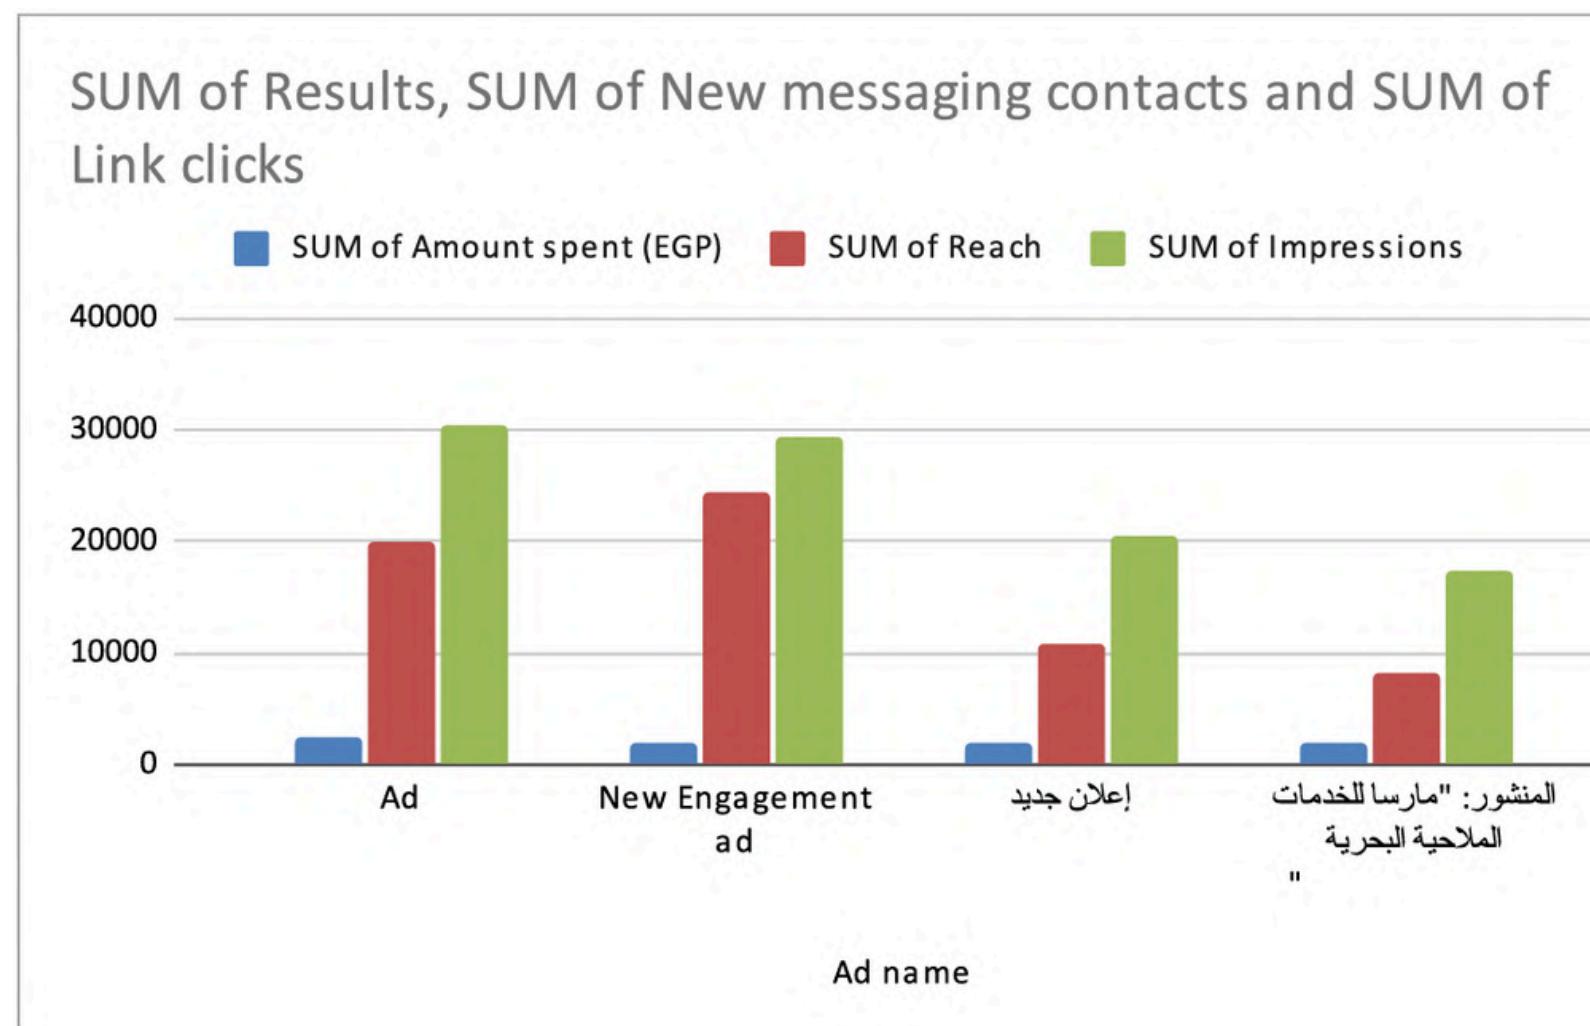

The screenshot shows the homepage of the Marsa Group website. At the top, there is a navigation bar with links for Home, Our History, Services, News, Contact Us, and a Request A Quote button. The main header features the Marsa Group logo and the tagline "for trade and shipping services". Below the header, a large image of a cargo ship at sea is used as a background for a promotional message. The text reads: "Streamline global trade with CargoX." and "Secure, fast, and reliable". There are two call-to-action buttons: "Check CargoX" and "Watch Our Presentation!". The URL <https://marsa-group.net/> is displayed at the bottom right of the page.
